

up the EPA to provide these litter bags to encourage it with an optional situation where the person, and we're asking for public opinion and public help on this to accomplish this program of removing the litter and a realistic way of having litter bags provided to them. The record really shows that shopping centers, where they freely provided litter bags, where some people running for public office have put handouts of litter bags in their campaigns already. We're just intensifying this effort and going at it in a palatable way to the general public. I think when you've cast your vote on this one you should think how it reads back home when you've voted for that \$2 fine against an optional program to gain public opinion, to gain public support in cleaning up the litter of this state. We have a bill here that is not perfect yet, but we're coming with a general approach that will have the public acceptance if we put these amendments, such as this one, on it. I urge you to vote to remove the \$2 penalty, the \$2 fine and the "shall" provisions on the litter bags, and leave a program that is really going for the public support in this whole program. Thank you.
